

The Artisan 7 Extractor

*Designed
and built
by European
craftsmen
for the
cannabis
artist.*

The Artisan 7 provides the extraction artist with a system they can manually control, run various temperatures and pressures and flow rates to personally create their desired results. Like all the HTE Production Series, the robust build, ASME certified components, and safety are all built in. Utilizing one 7-liter gross capacity extractor and two separators, an optional third separator can be added, the extraction artist has the facilities and control to achieve their precise extraction characteristics. Its smaller footprint will allow it to fit into almost any facility.

Artisan 7 can also be utilized as an extractor for the processor needing just the capacity of a single 7-liter extractor and fit their budget! It can also be an auxiliary

extractor for the already busy operator or one that wants very specialized extraction in addition to their volume extractions.

Artisan 7 comes complete with its own chiller and heater for the water jacketed vessels achieving tight temperature control. Our unique fast closure system means no tools needed to open and close the extractor. All HTE systems utilize diaphragm pumps, best in class and quiet, with only annual service recommended. We can also offer optionally a higher flow pump, third separator with auto pressure control, Stainless Steel cabinet, Electric Hoist and rail, and Stainless Steel canisters. So, you can have the Artisan 7 customized for your needs.

2017 Las Vegas Show Special: \$169,900!

ARTISAN 7 EXTRACTOR
Single 7-liter extraction vessels with 5-liter canister
Super Critical and Sub Critical CO ₂ extraction
Pressure up to 2500 PSI (170 Bar)
15 kg/hr pump max pressure (30 kg/hr pump optional)
Separator 1: Gravimetric 2-liter
Separator 2: Cyclonic: 1-liter
Extractor: 7-liter
CO ₂ Accumulator: 12-liter
All vessels ASME-certified
Chiller: 4 kw @ 23°F, PID electronic control
Heater: 6 kw @ 140°F, PID electronic control
Tablet touchpad
4 pressure gauges
Stainless Steel skid
Electronic CO ₂ liquid level display
UL compliant electric cabinet
Dimensions: 6'7" H x 5'5" W x 2' D
Weight: 2000 lbs

Artisan 7 extractor as described at left: \$169,900

Optional equipment:

High-Flow CO ₂ Pump (36 kg/hr)	\$ 5,150
Separator S3 with Auto Pressure	\$15,430
Stainless Steel Cabinet	\$ 2,575
Electric Hoist and Rail	\$ 3,200
Additional 5-Liter Canister	\$ 5,000

The Hightech advantage: from initial purchase to installation to technical support, we're there to help. We'll work with you through every step of the process — selecting the right extractor, building the feature set you need, creating custom recipes — to help you achieve the lowest possible extraction cost per gram.
